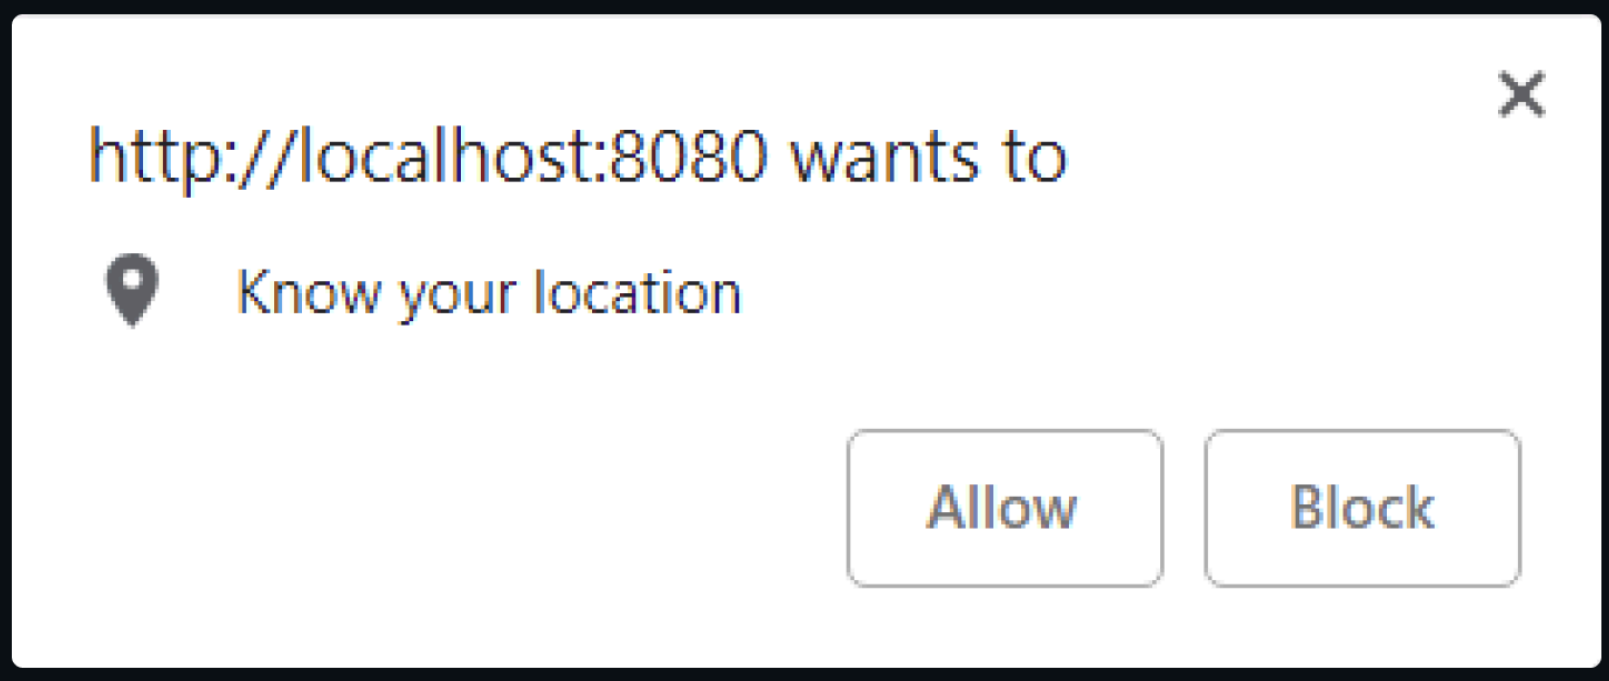
Get a User's Location with JavaScript!

JavaScript Mastery

https://jsmastery.pro

```
navigator.geolocation.getCurrentPosition(position ⇒ {
  const { latitude, longitude } = position.coords;
  console.log(latitude, longitude);
}, err ⇒ {
  console.error(err);
});
```



The browser will ask for permission.

If the user blocks it or doesn't give permission, the Geolocation API will not work.

https://jsmastery.pro

The **getCurrentPosition** function takes two arguments

```
navigator.geolocation.getCurrentPosition(successCallback, failureCallback);
```

It’s always better to first check whether the browser supports the Geolocation Web API.

```
if (window.navigator.geolocation) {
  // Browser supports Geolocation
}
```

Master Next.js!

Join the course and become the
Next.js Developer you know you can be.

FOR DEVELOPERS WHO WANT TO STAND OUT AND BECOME IRREPLACEABLE

Become a top 1% Next.js 14 developer in only one course
