

Different Ways to Create Object in

JavaScript

Object Literals

```
1 const obj = { key: "value" };  
2
```

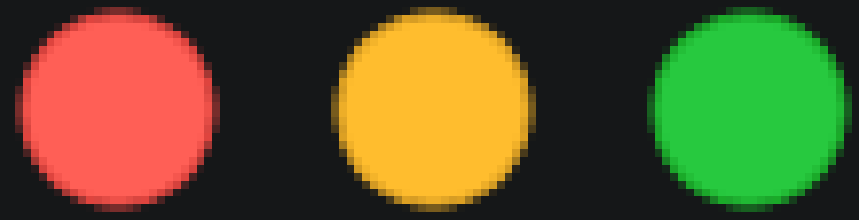

Object.create() Method

```
1 const obj = Object.create({ key: "value" });  
2
```

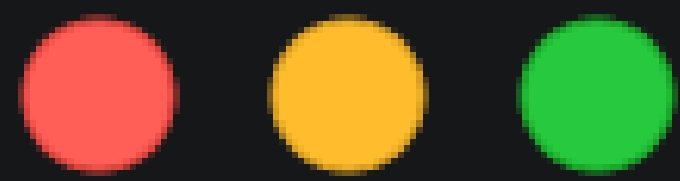

“new Object()” Syntax

```
1 const obj = new Object();  
2
```

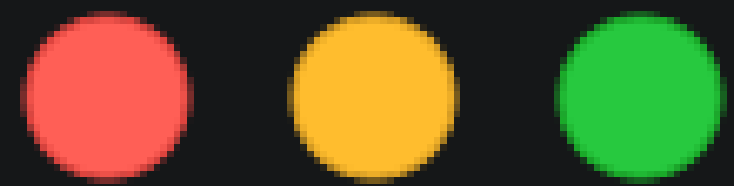

Constructor Function

```
1 function Person(name) {  
2   this.name = name;  
3 }  
4  
5 const obj = new Person("Gagan");  
6
```

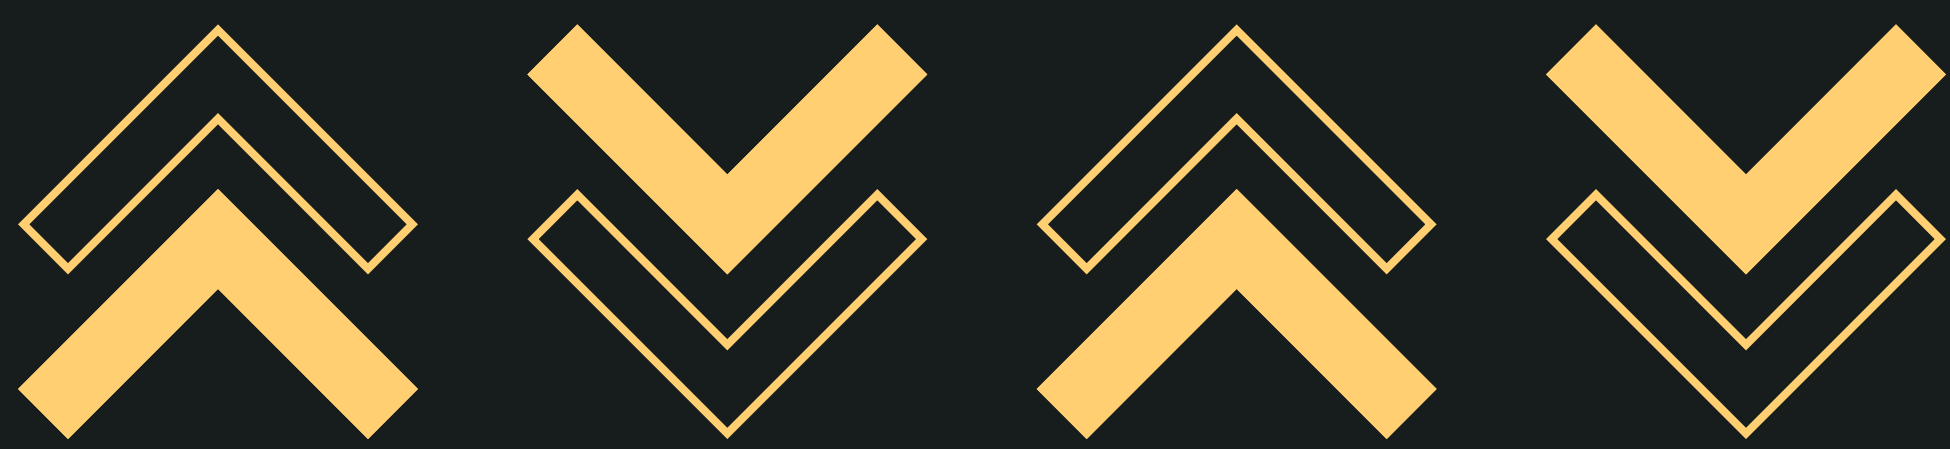

ES6 “class” Syntax

```
1 class Person {  
2   constructor(name) {  
3     this.name = name;  
4   }  
5 }  
6  
7 const obj = new Person("Gagan");  
8
```
