

Recursion

What does it mean?

Kacper Hernacki
@kacper.hernacki

Intro

**Recursion is a process of calling itself.
A function that calls itself is called
a recursive function.**

Kacper Hernacki
@kacper.hernacki

Syntax

```
function recurse() {  
    // function code  
    recurse();  
    // function code  
}  
  
recurse();
```

Kacper Hernacki
@kacper.hernacki

Intro

Here, the `recurse()` function is a recursive function. It is calling itself inside the function.

```
function recurse() {  
  // function code  
  recurse();  
}  
  
recurse();
```

function call

Working of recursion in JavaScript

Kacper Hernacki
@kacper.hernacki

Intro

A recursive function must have a condition to stop calling itself.

Otherwise, the function is called indefinitely.

Kacper Hernacki
@kacper.hernacki

Syntax

```
function recurse() {  
  if(condition) {  
    recurse();  
  }  
  else {  
    // stop calling recurse()  
  }  
}  
  
recurse();
```
